

500lt mobile foam unit

ERP : 402-009-019

● TECHNICAL CHARACTERISTICS

- The body of the product has a capacity of 500-litre foam concentrate and is made of a material withstanding the chemical impacts of the foam.
- The unit can be easily moved even on non-asphalt ground, thanks to its ergonomic structure.
- Maximum operating pressure: 16 bar.
- The hoses for connection to a hydrant or any fire water supply line and the water inlets of the unit are fitted with storz coupling.
- Water is supplied to the carriage by connecting the two 2 1/2" 10 m flat fabric hoses positioned on the carriage to a water source.
- DN100 foam monitor, which can operate at 360° horizontally and between -75° and 90° vertically.
- The inter-connections of all the parts of the system are tested 100% and waterproofing is checked (the foam is not included)
